Towards perfection

## REACH STATEMENT

REACH demands that any chemical substance produced or imported into the EU market in quantities of 1 tonne or more per year must pass under the scrutiny of the specific requirements detailed in the legislation.

Subject: Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH).

### REACH obligation

REACH demands that any chemical substance produced or imported into the EU market in quantities of 1 tonne or more per year must pass under the scrutiny of the specific requirements detailed in the legislation. The responsibility for compliance lies with any company responsible for manufacturing, importing, using or placing a substance, preparation or article on the EU market. This includes suppliers, distributors, downstream users and retailers. The whole supply chain is involved in communication along the supply chain and according to your position in the chain, your responsibilities will vary.

### MODEPACK obligation

Regarding the REACH, MODEPACK d.o.o. is strictly downstream user. In its products MODEPACK uses 2 general types of raw material: polymers and inks. Inks are strictly imported from EU countries. Polymers are imported from EU and from non-EU countries. The polymers manufacturers from non-EU countries are exporting their products to EU market and they have satisfied the REACH obligation. Since MODEPACK cannot preregister or register its products our obligation is to make sure that all components (raw materials and their components) in our products are preregistered or registered. Without the preregistration or registration of the components in our products our products won't be exported to EU market.

### Our statement

We declare that all our raw materials (polymers and inks) in our products (PE films, bags and sacks) that are exported to the EU Market are preregistered by our suppliers. If required, we can forward theirs statements.

We declare that no Substances of Very High Concern (SVHC) in the amount of more then 0,1 % for authorization up-dated on the 01.12.2017. are intentionally used in our production process.

# MODEPACK

Towards perfection

We do not test our products for these substances; based on our knowledge of the raw materials, chemical reactions and processes to make these products, we would not expect them to be present.

It is our obligation to inform you if any of the substances we use will be classified as a SVHC in future.

## Board approval and more information

This statement has been approved by the company management and shall be reviewed by the management review team regularly. For all questions concerning REACH Directive we are available at the email: [info@modepack.com](mailto:info@modepack.com)
